PROFESSIONAL SUMMARY

Software Engineer with 1.5+ years of experience developing full stack and back end web applications and services in .NET, ASP.NET, C# and Nodejs. experienced in building Scalable and robust Web applications and APIs. Worked on variety of enterprise and government projects including Suthra Punjab Waste Management System. Worked on real time vehicle tracking and monitoring systems.

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, PHP, SQL, HTML5, CSS3
Backend: ASP.NET Core, .NET, Web API, MVC, Node.js, NestJS, PHP, REST APIs
Frontend: React.js, Next.js, Tailwind CSS
Databases: SQL Server, MySQL, PostgreSQL, MongoDB
Tools: Docker, Azure DevOps, CI/CD, Git, GitHub, Redis
Practices: Clean Architecture, JWT, Authentication & Authorization, SOLID, OOP, Agile/Scrum, Unit Testing

PROFESSIONAL EXPERIENCE

Software Engineer — .NET Core / Node.js | CodingKey Nov 2025 – Apr 2026

- Created RESTful APIs and back end services with ASP.NET Core, C#, Nodejs and Nestjs.
- Developed and enhanced backend services using MySQL for data persistence and application functionality.
- Designed and implemented JWT based user and role management.
- Applied Clean Architecture principles to structure application components and services.
- Worked closely with the front end and QA teams to design, code and test application features.

Software Engineer — ASP.NET Core / SQL Server | AskTech Ltd. Mar 2025 – Nov 2025

- Developed **ASP.NET Core Web APIs and SQL Server solutions** for enterprise applications.
- Led backend development for Suthra Punjab, a government Waste Management System, supporting reporting and operational workflows.
- Built a **real-time GPS vehicle tracking system** with POI detection and automated alerts.
- Optimized SQL queries and integrated third-party APIs to improve application reliability and performance.

Web Developer Intern | Pakistan International Airlines, Islamabad Aug 2023 – Sep 2023

- Enhanced internal web applications using **HTML, CSS, and JavaScript**, improving UI usability and accessibility.

PROJECTS

MedLine Rural | PHP, MySQL, HTML/CSS/JavaScript

- Built a web-based medical supply management system for rural and remote clinics, covering inventory, supply requests, shipments, vehicles, and drivers.
- Implemented role-based access control and clinic-level data isolation for secure access to operational data.
- Developed an explainable urgency-triage workflow based on clinical criticality, stock-out risk, transit risk, and cold-chain risk.
- Implemented shipment tracking with status updates, simulated GPS/temperature telemetry, alerts, and operational dashboards.

Complaint Management System | ASP.NET Core, SQL Server

- Developed a backend-driven complaint management system with RESTful APIs and SQL Server.
- Achieved 90%+ automated test coverage.

Sales Forecasting Tool | Node.js, React.js, Python

- Built an e-commerce forecasting platform integrating ML models with a Node.js REST API.
- Developed a React dashboard for visualizing forecasting results.

EDUCATION

B.S. Computer Science — National University of Technology (NUTECH), Islamabad | **2020–2024**
